## Where Perfection stretches its wings towards a strong Vision

 School with a future vision, miles apart...

Kids aren't perfect so neither the adults, we believe in striving for excellence, not perfection.

Our classrooms are designed in such a fashion that every child finds his learning goal-directed towards their attainment.

Creativity has stories to share on our walls. We help our parents discover the inside story of their wards.

## We Respect choices

At Quro School we don't believe in giving a series of lectures as part of learning but each and every individual gets the freedom to express, be creative, and learn mostly by doing, which is commonly remarked as experiential learning. An integrated curriculum helps students make connections across curricula, linking and applying skills and knowledge from multiple sources and experiences.

Multiple intelligences account for broader individual attention, simple instructions, and exposure to learning independently and respond. Different types of activities with varying degrees of complexity are provided in order to focus on different learning styles and kindle the spark to realize their true potential.

The emphasis in such a program is on learning rather than teaching and thereby making our students stand apart in a crowd.

*Excellence is the unlimited ability  
for self -improvement in a promising Environment*
